

# SHELLEY POINT NEWS

A community newsletter  
dedicated to fostering a sense of  
community and the free flow of  
information at Shelley Point

Summer 2022

## FROM THE EDITOR:

And once again, the year has flown by and the festive season is already upon us. I truly hope that 2022 has been a happy, peaceful and successful year for you all and that as we rush headlong into a new year, all your dreams, goals and aspirations will be achieved. A very warm welcome to all our non-resident homeowners who make the annual pilgrimage to Shelley Point for their holidays. No doubt you will be amazed by the huge amount of development which has taken place on our beautiful Estate over the last year. Shelley Point is a true gem, that's for sure!

And to keep our Estate safe, secure and pristine, please ensure that guests, visitors and tenants are aware of the rules regarding open fires, pets, speed limits and the dumping of garden and household refuse. Please also remember that fireworks are banned on the Estate.

May you and your families all have a safe, joyous and happy time over the festive season

Enjoy,

**Terry**

## CHAIRPERSONS BRIEF: (Carlos Gomes):

Convening meetings via web-based applications has become the “new normal” with platforms becoming more sophisticated and providing benefits that were unthinkable a few years, if not a few months, ago. This year’s SPHOA AGM will be a “hybrid” offering Members the choice of in-person or web-based participation using the *WeconnectU* platform, *MeetingSpace*. This platform offers a number of improvements over the platform used at our previous AGM’s and is a lot more cost effective.

As is often the case with technology, there are some underlying requirements and limitations and so, to address the more salient ones:

- Access to a *stable Wi-Fi connection* with a download speed of at least 4 MBps (preferably more) is a prerequisite. It is advisable to limit the number of devices connected to the network whilst participating in the meeting.
- A reasonable level of computer literacy and familiarity with online meeting platforms is recommended. If in doubt, please make use of the tutorial embedded in the notification emailed by Residentia Trust on 1 December 2022.

Access to the online meeting platform will open from about 13h50 (CAT) on Friday 23 December. If you intend to participate in person, you are kindly requested to arrive at the venue at 13h30 on Friday 23 December.

Regardless of your chosen mode of participation in the AGM (in person or online), you are requested to have your smart phone at hand as it will greatly speed up and facilitate the voting process. To list but a few of the benefits of this platform:

- Immediate (as soon as polls close) circulation to all participants of the polling results. This eliminates the need to count the “in hall” votes and having to aggregate these to the online votes.
- The system automatically detects and allocates the number of votes the Member holds should he/she have more than one property and /or be the holder of a registered proxy(ies).
- Voting results are captured in the platform data base for future audit purposes, if required.

Should you not have a smart phone (*is there still a SP Member without one?*), we will devise a way to accommodate you. However, this will slow down the process and mitigate some of the advantages alluded to above.

**Important:**

- It's essential that you verify that your information (especially email address and mobile number) in the Residentia Trust WeconnectU data base is up to date.
- To verify your information please log into the Residentia Trust WeconnectU portal - refer to the circular issued by Residentia Trust on 3 November 2022 for details.

Lastly, I would like to use this opportunity to wish you and your loved ones a blessed festive season and a prosperous New Year.

**SECURITY REPORT (Henry Edmunds):**

I recently came across an article which I believe is pertinent to share with fellow Members:

*“How many times have you heard someone say that they’re safe because they live in a gated community, have an alarm in their car and home or live in a nice neighbourhood? Some don’t even lock the doors to their home or car. It’s understandable that this way of thinking can result in someone becoming the victim of a crime. What are the basics? They are the things we’ve become complacent about because of alarm systems, security cameras and high-tech equipment that we rely on to protect us, our home, our families and our possessions. We’ve become vulnerable because we expect special equipment or someone else to take care of us. As any expert will tell you, it’s paying attention to the basics that will help us from becoming victims of crime.”*

Lastly, as the season transitions into the 'dry and windy' period, please adhere strictly to the 'no open fire' rule and ensure that your visitors and tenants are duly informed of the potential fire hazard.

**Closed fires such as those shown in the three photos above are allowed while "open fires" such as those below are not permitted at Shelley Point.**

My best wishes to you and your loved ones for a safe and secure festive season.

**ENVIRONMENTAL COMMITTEE: (Prof. Chris de Beer):**

Latest developments regarding the activities of the Environmental Committee are reflected in the HOA Chairman's Annual Report which has already been circulated to all Members. Other matters of interest include:

- The Trail Camera Initiative came into fruition with the potential of providing valuable information steering our wildlife management initiatives.
- Following initiatives taken by Members and aligned with the Environmental Committee's public awareness campaign, a successful and well-attended tree planting day was held on 1 September.

**The tree planting day on 1 September**

**Public access to Shelley Point:** (The following is an unedited document written by Prof. de Beer pertaining to Estate access).

- It came to our attention that there may be uncertainties among residents regarding Public Access to the Estate, with the view to enjoying the Coastal Public Property adjacent to the Estate.
- It should be noted upfront, that the SPHOA has no mandate regarding Public Access **along the coastline** to Coastal Public Property adjacent to the Estate, apart from its public duty of care, which includes reporting transgressions to the relevant authorities. However, **Public Access to the Estate** with the view to using and enjoying the Coastal Public Property Adjacent to the Estate, has been comprehensively provided for in the Constitution of the SPHOA.
- According to the relevant provisions of the Constitution of the SPHOA, and with reference to the relevant conditions pertaining to the establishment of the Estate, the HOA is **obliged** to allow Public Access to Coastal Public Property adjacent to the Estate *via* the OLD GATE, along public servitudes registered on SPHOA owned Communal Property (Erven 2893, 2973 and 3032), known, among others, as GOLDEN MILE BLVD up to the parking facility located at SHELL BAY, and as the Boardwalk between 2<sup>nd</sup> and 3<sup>rd</sup> Street. In **addition** to the above, and as per the Constitution of the SPHOA, permission was granted by the SPHOA to the public (especially surfers) to proceed from the parking area located at SHELL BAY via 1<sup>ST</sup> AVENUE to the SPHOA provided and demarcated parking and changing facility at the beachfront. Public Access *via* the OLD GATE, is subject to compliance with the Estate's security arrangements.
- The access granted to members of the public to the Estate in accordance with the above, is also confined to the cadastral boundaries of the Communal Properties indicated above and members of the public may not, without prior permission from the Estate Security, access any other communal property. Suffice to say that unless explicitly permitted by the Owner, private property remains out of bounds for such members of the public, and the rights of Owners/Residents as embedded in the Rules of the Estate must be respected by them at all times.
- Save for the afore-mentioned public servitudes and the concomitant Public Access rights, the SPHOA is not aware of and has not been consulted on any other declared Public Access Land (as per the relevant

statutory provisions and related procedures), granting Public Access to any other area within the perimeter of the Estate *via* Communal Property.

- In conclusion, the SPHOA wishes to appeal to its Members to adhere to current National Legislative Provisions regarding the launching of **motorised vessels** and the driving of **motor vehicles** on Coastal Public Property. As there are no approved (and as such declared) Private/Public Launching Sites within the perimeter of the Estate, the launching of any motorised vessel, as defined in the relevant National Legislation, is not allowed anywhere within the Estate, and no access to the public to perform related prohibited activities will be granted *via* Communal Property.

Prof. Chris de Beer: Trustee

### SPORT AND SOCIAL ACTIVITIES:

**Golf (John Huxted):** With summer well on its way, we can look forward to many summery golfing days. However unfortunately with summer, also comes the wind! There has been plenty of maintenance activity on the course over the last few months. The Spring Maintenance programme in September involved five days of hard work from the greens staff and included tinning the greens, bunker maintenance and other tasks. In my opinion, the course is looking the best it has in many years due largely to the dedication and commitment of the greens staff as well as the installation of new irrigation systems on holes 2 and 3.

In October, the NG Kerk held its annual golf day where forty-eight golfers took part in a 2-ball scramble. The day was supported by many local companies including local estate agent KBS who offered a welcoming tippie.

December promises a full programme with the Captains Charity Day on Saturday 3 December and the Annual Members Fun Day on Saturday 17 December. Regarding the Captains Charity Day, the chosen charity is HP Williams Primary School and all funds raised will go towards the school's various projects. The format of the competition will be 2-ball American Scramble with a shotgun start at 9am. If any players are keen to enter, please contact the Pro-Shop on 022 7421037.

With club membership dues paid in October, we currently have over seventy members including a new 'virtual member' category which allows the member to gain a GolfRSA national handicap. Although the virtual membership doesn't provide the same benefits of full membership, it allows the player to compete in competition and pay affiliated fees. New special rates are also introduced to encourage more players to participate during the weekdays. For more information, contact details are available in the directory on the back page. Happy Hacking!

**Lawn Bowls (Marius Jacobs):** The membership of the Shelley Point Lawn Bowls Club has grown to twenty members following a membership drive at the end of June this year. Fourteen of these members attended a fun and very enjoyable Spring Day celebration game in September.

Bowling conditions continue to improve because of ongoing interactions and contributions from members, Club Manager, Green Keeper and various other staff. Our members regularly assist with eradicating weeds and kikuyu grass on the green and in addition, curtains have also been installed in the bathrooms. A big thank-you must also go to member Braam Cronje who made and donated a high-quality Tabs-in board to select teams and indicate playing rinks.

The annual Lawn Bowls Championship was held in April this year and was won by Etienne Coetzee with George Wade as runner-up. Etienne in addition to being this year's club champion, also continues to generously donate his time to give expert training sessions to beginners and anyone else who is interested in trying their hand at the game. Early next year, we look forward to hosting a group of twenty-four players from the UK who will be touring the West Coast and stopping over in Langebaan, Velddrif and Yzerfontein. A game has been scheduled with them for 10 February 2023.

Weekly games are scheduled every Tuesday and Friday at 9h00 during the summer months. For further information, contact details are available in the directory on the last page

**Tennis: (Marquin Strauss):** There has been a great turnout at the tennis club over the last couple of months and as such, we are considering increasing our weekly session to twice a week. Our club is also looking forward to welcoming non-resident homeowners who will be visiting over the festive season and would like to play. Our budget is looking very healthy at this stage and we will try our utmost to keep this upward trend going forward. If anyone would like to join the club or would like additional information, please consult the directory for the tennis captain's contact details.

**Bridge (Terry Mackintosh):** The annual Christmas Bridge Tournament will be held at the Shelley Point Sports & Social Club on Friday 9 December. Players from all over the Western Cape have registered to play – from Langebaan, Yzerfontein, Darling, Port Owen, Velddrif and even from Cape Town. Of course, our players from Shelley Point will also be there hoping to keep the local flag flying high.

We are still looking for bridge players to bolster our club numbers. All levels of bridge skills are welcome - from beginners to advanced players. For more information, consult the directory on the back page.

**Poker (Angelique Dermit):** The Poker Club was started with the aim of providing homeowners and residents with additional entertainment, a chance to relax, meet new people and most importantly, have fun! It has proved to be so popular that many requests have been received to expand the games to include various other forms of gaming entertainment. The Game Club Team has already begun planning additional events.

But back to Poker...popularity in the club has grown steadily and the aim is to have at least four poker tables per session. Players find it very enjoyable as there is none of the pressure that one will encounter in professional poker circles. Only one buy-in of R50 maximum per table and pot winners receive a percentage up to R250 maximum per table.

Beginners and novice players are most welcome to join in and to assist them, quick training sessions are offered for an hour just prior to the start of every tournament. More advanced players are also more than happy to assist less experienced players during play. The dress code is smart and each player is requested to bring a plate of snacks for the buffet table as well as their own beverage of choice.

**September winner Mike Parker**

As from January 2023, an annual Game Club Membership fee of R100 per person will be required which will allow members to participate not only in the Poker Nights but also in any other planned Game Club events for the year. Visitors will not be subjected to the membership fee but will only be charged the event fee for the evening. Funds raised from fees will be donated towards a charity nominated by the Poker Club and therefore, anybody who would like to contribute R100 towards the charity, will be automatically registered as a member of the club. Funds generated from the games nights will be used to cover the costs of table tops, consumables and prizes.

Winners so far are Aldo Fourie (August), Mike Parker (September) and Driekie Parker and Johan Groenewald (October - Table 1 & Table 2 respectively). On 15 December, there will be a final playoff between all winners up to the end November while a Poker Year End Party is scheduled for 29 December with a buy-in of R100 per person and a Beach Style party afterwards with a welcome cocktail, prize-giving and music. Feel free to invite your family and friends to this fun-filled evening. Please also remember that Poker nights are held on the last Thursday of each month and all interested players must book seats well in advance for tournaments as space is limited. For more information, contact Angelique on 0824821741.

**Ladies Fitness Classes: (Tanya Schillerman):** Want to look good in your bikini over the festive season? Or, want to find a way to shed those excess kilos that tend to creep on during the festive season? No worries – join *Women Making Moves*, a fitness group that meets in the Breakaway Room of the Shelley Point Sport & Social Club every day Monday to Saturday. According to Shelley Point resident and active participant, Karin d’Orville, there are three fitness instructors who present classes to ladies of all ages, but mostly in the 40-75-year age-group.

They currently have seventy-four active members and growing! According to Karin, the focus is on getting

women stronger while working on their flexibility and fitness. This is done in a wide variety of classes – Strong Nation HIIT, Zumba, Zumba Gold, Zumba Toning, Aqua Zumba, Yoga, Meditation (Yoga Nidra), Body Sculpting, Tabata, Pound The Rockout Workout, PiYo Ball, Pilates and Rebounding. So, lots of variety and you will never get bored!

The ladies often also get together on a social basis and make all members feel like they belong. They also reach out to the surrounding community by playing netball to raise funds for the disadvantaged. For further information, contact Tanya on 076 2877412. Booking for classes is essential and prior to joining, you will meet the instructor for a short meeting and mini assessment.

**Kayaking (Billy Fisher):** We have had a wonderful season this year with the interest in kayaking expanding at an incredible rate. Many of our locals have joined in with some of the commercial trips and have enjoyed the experience. So, with summer here in all its glory and with the waters and the wildlife beckoning, why not answer the call and experience the beautiful Shelley Point coastline for yourself. You will usually see dolphin, sunfish and seal and possibly also penguin, otter and whale. Anyone with their own kayaks are most welcome to join one of the commercial trips for company and for safety and at no charge. For more information, consult the directory on the back page.

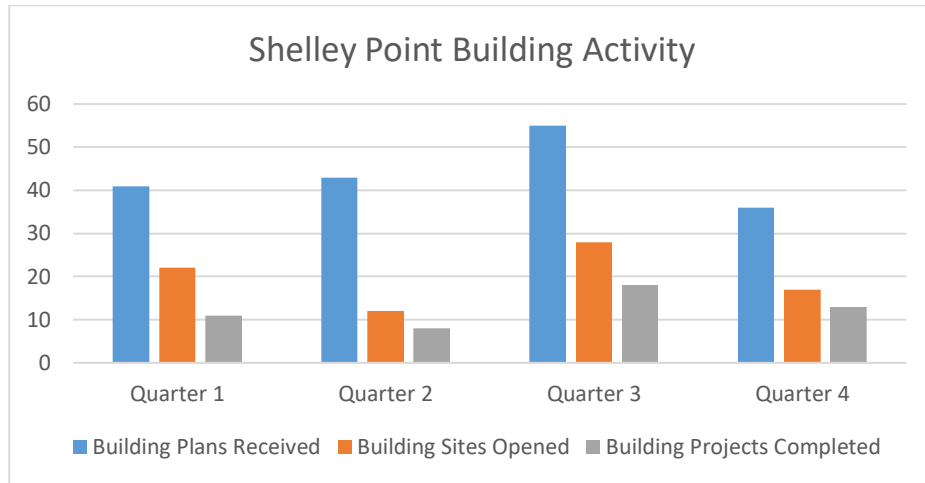

## LIFE AT SHELLEY POINT

**Building Activity at Shelley Point: (Aldo Fourie):** Since the last report on building activity, it looks like the tougher market conditions did not slow down building related activity as expected. Building plans kept on coming in and new building sites were opened at a rate of knots. It seems that new property owners would like to get as much building done before the December shut-down period that will be in force between 15 December 2022 and 16 January 2023.

With windier weather conditions this time of year, it becomes even more challenging keeping building sites in a neat and tidy condition. Our BCO is however out and about to ensure that builders do what is required to comply with the Rules of the Estate, a full-time job indeed. Thank you to the builders that adhere to these rules and try to minimize the disruption caused to existing homes and residents. We should remember that Shelley Point is a developing Estate and a very popular one at this stage!

*Quarter 4 figures are taken as of 14/11/2022*

*Building Plan Figures include Alterations to existing houses*

**Rainfall:** According to our rainfall recorder, Henri Roux, Shelley Point received a total of 23.0 mm during the last quarter of 15 August to 14 November. Please note that any rainfall recorded after 14 November will be reflected in the next quarterly newsletter which will be circulated early in March 2023.

**Shelley Point Stars and Stalwarts (SPN Team):** At Shelley Point, we have a significant number of homeowners who have achieved remarkable success in a huge variety of endeavours and ventures. As such, it was decided to showcase some of these achievements in the newsletter. So, if you know of anyone who has accomplished something that would be of interest to our readers and who would be willing to be interviewed for the newsletter, please email me at [shelleypointnews@gmail.com](mailto:shelleypointnews@gmail.com). Since Pieter Viljoen was the one who came up with the idea and since he has just published an eBooklet called *Shelley Point Flora*, we thought it would be pertinent to kick off our first interview with him! So here goes...

**Editor:** Pieter, I believe you have published an eBooklet on flora at Shelley Point. Please can you tell us why you decided to publish a book of this nature.

**PV:** Plant identification is one of my hobbies and being relatively new here and not familiar with Strandveld, I started a Plant Checklist for SP. Also, people often post photos of wild flowers on the SP Fauna and Flora WhatsApp group with a request for identification. With quite a few plants of conservation concern at SP, I realised that a photographic guide will be useful to help residents identify plants and raise awareness of the local plant diversity.

**Editor:** You clearly have much experience and knowledge in this regard. Can you tell us a little about your qualifications and work history in the field?

**PV:** I am a Saasveld-trained forester, but also hold degrees in Botanical and Zoological sciences. My employed work history includes research into human-wildlife conflict, silviculture, land rehabilitation and weed science at the old State Forestry Department and the CSIR. As a self-employed person, I worked locally and internationally as auditor, practitioner and trainer in the fields of Forest Stewardship Certification, Environmental Impact Assessment, Forest Fire Management, Nursery Practice, Sustainable Fuelwood Production and Natural Resource Management.

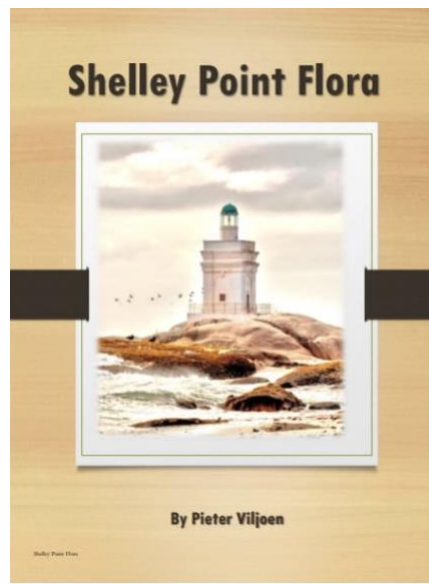

**Editor:** How did you go about the process of writing and publishing the booklet and were there any challenges involved in the process?

**PV:** The biggest challenge was the identification of the species and obtaining photographic material that shows the plant's overall appearance, flowers and fruit. This required monitoring over all four seasons of the year. Ecological interactions were also recorded. Mariette Jearey helped with photos where mine was lacking and Helena Bührman had the wonderful idea to make an eBooklet, rather than a printed pamphlet. This will enable easy updating.

**Editor:** Since many of our readers will, no doubt, like to obtain a copy of the booklet, please can you provide us with a link for those who would like to download it. Is there a cost involved?

**PV:** The booklet is available free of charge on the SPHOA web site.

**Power and Water outages at Shelley Point (SPN Team):** Not only have we had an unprecedented amount of load-shedding over the last few months but there have also been numerous planned water stoppages of late due to general maintenance and repair. However, in addition to this, we have also recently had several *unplanned* power and water outages which are usually due to equipment failure e.g. a blown transformer, a burst water pipe or something of this nature. These naturally cause much unhappiness in households already labouring under the planned outages. As a result, when the unplanned outages happen, many homeowners resort to calling the Estate Manager to report these sudden interruptions in water or power. However, our Estate Manager, Security Manager or Maintenance Manager are not responsible for power or water problems on the estate. Nor are they able to do anything in this regard. When a sudden and unplanned interruption in power or water happens on the estate, they know as much as we do about it. Homeowners need to contact the relevant department at SBM where they will need to supply details such as account or meter numbers and will usually receive a reference number in return. As a homeowner, there is a contractual obligation for the municipality to provide you with the relevant services for which you pay. So, if any problem arises, the Municipality must fix it. The Estate Manager cannot help in this regard – he cannot tell you what the problem is, when it will be resolved or how long it will take.

On that note, make a point of downloading the digital citizen app. It really makes life a lot easier when dealing with the Municipality. Go to your App Store and search for 'Saldanha Digital Citizen' and then register as a user. It's quick, easy and very efficient.

**Water Safety (Billy Fisher):** The West Coast and particularly Shelley Point, has one of the most beautiful coastlines in the country - scenic bays, rock pools and long stretches of sandy beaches. However, it also comes with its fair share of dangers - treacherous sea currents, thick mists and howling winds which can (and often do) change by the hour. Due to these many dangers, there have been incidents where visitors and residents have found themselves and their families in trouble by venturing out into the sea in adverse conditions. Some individuals have even been swept out to sea but fortunately were rescued without loss of life.

Some local-residents, concerned about these dangers and the potential of fatal accidents have come together to create a WhatsApp group whereby information can be shared. They have also been responsible for sponsoring NSRI Lifesaving Buoys on the main beaches and being available to assist in the case of any emergencies. These issues have also been raised with the Sports & Social Committee who have expressed their support for such an initiative and have requested a plan of action to be submitted.

Any Shelley Point resident who has a water craft and/or some form of seafaring experience are kindly requested to join the WhatsApp group so that they can be of assistance if required. The contact details to join the group are as follows: Adrian 0842409909. Further information and progress regarding this initiative will be available in the next newsletter.

**Fibre Network at Shelley Point (SPN Team):** Fibre installation on the Estate commenced in early November and according to a communication sent out by the HOA on 27 October, the 'go live' date has been scheduled for 28 February 2023.

**Speeding on the Estate (SPN Team):** The speed limit throughout the Estate is 40km/hr. Unfortunately, this is often ignored by contractors, taxis, guests and even residents and it has therefore been necessary to introduce additional speed bumps as well as speed monitoring cameras. Please note that any speeding transgressions recorded from 12 September onwards will be subjected to penalties. Ensure that your guests, visitors or tenants are aware of this.

**Rock pools by Henri Roux**

## CONSERVATION CORNER: (Pieter Viljoen):

**Manatoka – the silent invader:** On the Saldanha Bay Municipality website, one will find a six-page document titled *Myoporum insulare* – Manatoka “The Silent Invasion”, authored by Johan West, MD of the *Green Africa Group*. The document describes the tree, its ecology and its adverse environmental impacts as an invasive alien tree in South Africa. It is endemic to the coastal areas of Southern Australia where it is known as Common Boobialla. The tree is listed in the National Environmental Management: Biodiversity Act (Act no. 10 of 2004) as a Category 3 Invader Species. Simply put, as of 2004, it may not be planted or sold and landowners must control it on their properties. The seed of this drought-resistant and salt-tolerant tree germinates

*Myoporum insulare* – pretty but nasty

and grows readily in our semi-arid environment. Seeds are dispersed by fruit-eating birds and Cape Angulate Tortoises. It is a popular tree to cultivate and unfortunately, it is planted at Shelley Point for hedging and shade purposes. However, it smothers the natural Strandveld vegetation and has relatively few ecological interactions – our resident antelope species do not utilise it, nor is it visited by bees and butterflies.

Manatoka can be considered as the ‘signature’ tree of the West Coast because it is found everywhere. However, as mentioned earlier, it is our legal duty to refrain from planting it and to control or remove it wherever possible. The SP Environmental Policy and Guidelines endorses this statutory requirement. South Africa has many wonderful indigenous trees that are well-suited for our local climate and the following trees are recommended in lieu of Manatoka - Blue Kuni Bush\*, Dune Crow-berry\*, Coastal Camphor Bush\*, Kei-Apple\*, False Olive, Karree, White Karree and Sweet Thorn. If you require a large tree, species such as Coast Coral Tree, Coastal Silver Oak\*, Wild Olive, White Milkwood, Karoo Boer-bean and Wild Plum will flourish if planted correctly, cared for properly and will attract the local wildlife to your garden. (\* Suitable for hedges.)

**Feral Cats (SPN News Team):** It has come to our notice that there are certain homeowners and residents on the Estate who are taking it upon themselves to chase away, scare and even kill feral cats on the Estate. Apparently, there are reports of homeowners using pellet guns, dart guns and catapults on the cats or even going as far as to attempt to poison them. Please note that any activity of this nature is illegal and transgressors will be reported to the SPCA and other animal welfare associations for subsequent prosecution. Please bear in mind that removing feral cats from an area only creates a vacuum into

which feral cats from neighbouring areas will move. Let's rather stick with our largely-sterilised feral cat population than provide opportunities for large numbers of unsterilized cats from outside Shelley Point to move in and populate.

Pictured alongside is a male feral cat called 'Sibs' who lives on the Estate and was sterilised several years ago. Beautiful as he is, he fortunately can't father anymore kittens.
